

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-12 (Canceled)

13. (Currently amended): A partition system for partitioning a work space having a floor and a ceiling, comprising:

a frame including at least one vertical frame member and at least one horizontal frame member, said horizontal frame member spaced from the floor and the ceiling;

a least one spring clip removably attached to ~~one~~ each of said horizontal and said vertical frame members, said spring ~~clip~~ clips each including a spring body portion with a pair of leg portions extending therefrom, ~~one of~~ said leg portions ~~and said spring body portion~~ engaging respective said ~~one~~ frame ~~member~~ members; and

a partition system component including a plurality of receiving ~~element~~ elements to which is attached the other of said leg portions and through which said spring body ~~portion~~ portions of said spring ~~clip~~, ~~said spring clip thereby attaching~~ clips are received to thereby attach said partition system component to said frame ~~member~~.

14. (Currently amended): The partition system of Claim 13, wherein said partition system component is a tile member, said tile member disposed externally of said frame and covering at least a portion of said frame.

15. (Canceled)

16. (Currently amended): The partition system of Claim 13, wherein said frame includes a floor track and a ceiling track attached thereto, said floor track supporting said frame on ~~[[a]] the floor surface~~ and said ceiling track mounted to ~~[[a]] the ceiling surface~~.

17. (Original): The partition system of Claim 16, further comprising a ceiling trim element removably attached to said ceiling track by at least one said spring clip.

18. (Original): The partition system of Claim 16, further comprising a floor trim element removably attached to said floor track by at least one said spring clip.

19-26. (Canceled)

27. (New): The partition system of Claim 13, wherein said spring clips are mountable at any position horizontally along said horizontal frame members.

28. (New): A partition system for partitioning a work space having a floor and a ceiling, comprising:

a plurality of separate frames connected to one another, each said frame including at least one vertical frame member and at least one horizontal frame member, said horizontal frame members spaced from the floor and the ceiling;

a least one spring clip removably attached to each of said horizontal and said vertical frame members of each frame, said spring clips each including a spring body portion with a pair of leg portions extending therefrom, said leg portions engaging respective said frame members; and

a plurality of partition system components each including a plurality of receiving elements through which said spring body portions of said spring clips are received to thereby attach said partition system components to said frames.

29. (New): The partition system of Claim 28, wherein said partition system components are tile members, said tile members disposed externally of said frames and covering at least a portion of said frames.

Application Serial No. 10/821,030
Amendment dated July 5, 2005
Reply to Office Action dated March 17, 2005

30. (New): The partition system of Claim 28, further comprising at least one floor track and at least one ceiling track to which said frames are connected, said floor track supporting said frames on the floor and said ceiling track mounted to the ceiling.

31. (New): The partition system of Claim 30, further comprising a ceiling trim element removably attached to said ceiling track by at least one said spring clip.

32. (New): The partition system of Claim 30, further comprising a floor trim element removably attached to said floor track by at least one said spring clip.

33. (New): The partition system of Claim 28, wherein said spring clips are mountable at any position horizontally along said horizontal frame members.
